SKILLS

- **Client Support & Communication:** Customer service, stakeholder communication, issue resolution, relationship building, presentation skills, active listening, team collaboration, adaptable in fast-paced environments.
- **Technical Skills:** Python, SQL, Java, C++, C#, JavaScript, HTML/XML.
- **Data & Analytics:** Power BI, Advanced Excel, SQL Server, ETL processes, data modeling, dashboard development, data validation, reporting, KPI analysis.
- **Tools & Platforms:** Visual Studio, TensorFlow, Git/GitHub, Microsoft Office Suite, Power Query, Google Cloud Platform (GCP), AWS Cloud Foundation.
- **Business & Operational Skills:** Troubleshooting, documentation, workflow coordination, operational support, event coordination, volunteer management, multitasking, cross-functional collaboration.

WORK EXPERIENCE

Operations & Festival Support Assistant

Queer City Cinema, Regina, SK

July 2025 – Present

Festival Intern

July 2025 – October 2025

- Assisted with festival operations, volunteer coordination, and venue management for screenings and live events.
- Supported technical setup, projection systems, and event preparation to ensure smooth audience experiences.
- Collaborated closely with the Artistic Director to organize staffing, logistics, and post-event activities in fast-paced environments.

Tour Assistant – QALEIDOSCOPE: Queer Film and Performance on Tour // Nordic

February 2026 – Present

- Supported touring operations and coordinated day-to-day team requirements alongside the Artistic Director.
- Managed social media content, promotional graphics, and audience engagement activities for touring events and screenings.
- Assisted with venue coordination, live program support, and operational logistics across multiple event locations.

Educator (Retail Operations & Guest Experience)

lululemon, Ontario

October 2025 – February 2026

- Delivered customer-focused support and resolved guest inquiries in a fast-paced retail environment while maintaining high service standards.
- Assisted with store operations, transactions, inventory organization, and operational readiness during high-traffic periods.
- Strengthened communication and relationship-building skills through daily guest interactions and collaborative team support.
- Gained exposure to enterprise operational workflows and HR/payroll support systems used within large-scale retail environments.

Customer Interaction Specialist

Walmart Canada, Regina, SK

November 2022 – July 2024

- Led planning and coordination of Walmart-sponsored fundraisers including Children's Miracle Network Hospitals and the Breakfast Club of Regina.
- Developed a fundraising strategy that exceeded the \$25,000 target, raising \$27,000 and increasing donor engagement by 8%.
- Strengthened team collaboration and improved event efficiency through clear communication and task coordination.

Automation and Machine Learning Engineer

Defence Research and Development Laboratory, Hyderabad, India

August 2021 – February 2022

- Developed automated systems and ensured data accuracy through SQL scripting and data preprocessing.
- Built and deployed ML models for predictive analytics using Microsoft Visual Studio and Python.
- Collaborated with cross-functional teams to resolve system issues and deliver reliable solutions.
- Created documentation for recurring incidents and implemented permanent fixes to boost system reliability.

Research Project Assistant

IEEE Hyderabad Section, Hyderabad, India

May 2020 – May 2021

- Worked with Dr. Sachi Nandan Mohanty and Dr. Sasmita Subhadarsinee Choudhury on research involving statistical analysis, optimization algorithms, and ensemble modeling.
- Designed a machine learning model for crop prediction with 97% accuracy, improving overall project precision by 12%.

Computer Science Teacher (Grade 12/A-Level, Cambridge Syllabus) Learn At Educatia, Remote (Dubai, UAE)
May 2020 – May 2025

- Taught Python, SQL, and Computer Science concepts aligned with the Cambridge A-Level curriculum.
- Designed assignments and guided students in problem-solving, logical thinking, and debugging.
- Conducted live online classes and provided academic support to students across different time zones.

RESEARCH PROJECTS

AvianNET: Bird Species Identification using CNN and MFCC January 2024 – July 2024
Role: *Project Lead, University of Regina*
GitHub Repository

- Led the development of a deep learning model to classify bird species based on audio recordings using Convolutional Neural Networks (CNN) and Mel-Frequency Cepstral Coefficients (MFCC).
- Applied Python and TensorFlow to advance acoustic-based species recognition, improving classification accuracy and automation potential in biodiversity research.

Disproportionality Analysis in Adverse Event Data November 2024 – April 2025
Role: *Data Analyst, University of Regina*
GitHub Repository

- Developed SAS macros to transform adverse event data into drug/event matrices and calculate disproportionality measures for signal detection in pharmacovigilance.
- Outcome: Produced actionable insights that supported healthcare decision-making and patient safety improvements.

HR Dashboard Visualization using Power BI September 2023 – December 2023
Role: *Data Analyst, University of Regina*
GitHub Repository

- Analyzed a dataset of 22,000+ HR records using MySQL and developed interactive dashboards in Power BI to drive HR decision-making.
- Collaborated with stakeholders to identify key performance indicators and improve organizational efficiency through visual analytics.

Smart Agriculture Classifier using Soft Actor-Critic (SAC) August 2023 – November 2023
Role: *ML Engineer, University of Regina*
GitHub Repository

- Optimized the Soft Actor-Critic algorithm to improve decision-making efficiency in dynamic agricultural environments by 40%.
- Enhanced model responsiveness and reliability, supporting smarter automated control systems for precision agriculture.

PUBLICATIONS

Muppala, S. C., & Others. (2022). *InteliCrop: An Ensemble Model to Predict Crop Using Machine Learning Algorithms*. IEEE.

<https://ieeexplore.ieee.org/abstract/document/9752527>

Developed an ensemble model achieving 99.54% accuracy in rice crop prediction, supporting smarter agricultural planning.

Muppala, S. C., & Others. (2020). *Comparing Machine-Learning Algorithms for Anticipating the Severity and Non-Severity of a Surveyed Bug*. IEEE.

<https://ieeexplore.ieee.org/abstract/document/9276756>

Contributed to a study evaluating ML algorithms for software bug severity prediction, aiding in improved bug triaging and resolution.

EDUCATION

Master of Science in Computer Science (Data Science) October 2024
University of Regina, Regina, SK

CERTIFICATIONS

- **Data Science Professional Certificate**, IBM In Progress, October 2025
- **Google Cloud Skills Boost Certifications**, Google Cloud October 2023
- **AWS Cloud Foundation**, AWS September 2021
- **Azure AI Fundamentals**, Microsoft May 2021
